

ARRAN HIGH SCHOOL MTB CLUB
TRUSTEES REPORT SEPTEMBER 2025

We have continued to organise and run evening rides from our school despite very difficult personal circumstances and are pleased to say that two evening rides per week are now possible as we have another member of NAC staff assisting. We have had trips to Fort William and Glen Tress and are planning for the Strathpuffer event in the new year. We have also had two fundraising events at our pump track venue, which Scottish Cycling think is the first one on a Scottish Island, as well as camping trips on Arran,

We have focused on continuing to complete various tasks at our pump track build, including adjusting CCTV and floodlights etc., the use of which we are monitoring. It is gratifying to see how much the facility is being used by local families as well as mainland visitors, including some from Argyll who are attempting to build their own track.
